

African Communication Power Supply Rack Exchange

What is the African single Electricity Market (afsem)?

On June 3, 2021, The African Union officially launched the African Single Electricity Market (AfSEM). This marked the commencement of an electricity market that connected the power supply infrastructure of the Union's 55 member countries. The goal is the development of one continuous efficient and affordable electricity market across the continent.

How reliable is Africa's electricity supply?

Electricity supply reliability remains a huge challenge for countries across Africa. Power rationing, outages, and grid collapses are huge fixtures for many markets. According to a 2022 survey by Afrobarometer, only 43% of Africans reported a reliable electricity supply, with significant variation across countries.

Is rack centre partnering with telcables Nigeria?

Rack Centre, West Africa's Tier III carrier- and cloud-neutral data centre, has struck a collocation agreement with TelCables Nigeria, an Angola Cables subsidiary.

How do financial institutions support the development of African power pools?

Financial institutions support the development of the regional infrastructure and provide financial and technical assistance to improve the capacity of African power pools. With such support, the power pool design is susceptible to modification, especially regarding the technical aspects of the market and tariff design.

Rack Centre offers unparalleled reliability and connectivity, driving businesses in Africa's digital ecosystem to new heights with cutting-edge infrastructure and services.
