

# Ask for pricing of solar container leasing options

How much does a solar lease cost?

Solar lease payments range from \$150 to \$200 per month on a standard 25-year agreement. Your actual monthly costs can vary depending on a few factors, including the system size and your energy needs, according to Landon Wimmer, CEO and owner of Empower Home Services. In most cases, the lease payment is below the utility's average electricity cost.

What factors determine a solar lease price?

The size of your solar system, home condition, credit score and presence of escalator clauses are key factors that determine your lease price. Solar leases offer maintenance-free solar with no upfront costs but have drawbacks, including limited long-term savings and potential home sale complications.

Are solar leases a good option?

Solar leases offer maintenance-free solar with no upfront costs but have drawbacks, including limited long-term savings and potential home sale complications. Besides solar leases, you may consider cash purchases, solar loans and PPAs as alternative financing options.

Should you buy or lease a solar system?

Most solar leases require no money down, making solar accessible even if you don't have cash reserves for a purchase or a large enough tax bill to benefit from tax credits. The solar company handles all system monitoring, repairs, and maintenance. You don't need to worry about equipment failures or performance issues.
