

We have a variety of featured and innovative products which is created by our Research and Development department, our main product lines are: automatic fire suppression systems, special ...

With solar installations increasing by 40% year-on-year, the city faces both opportunities and challenges in energy management. Battery storage systems act like a "power bank" for the grid - storing excess ...

This roadmap provides necessary information to support owners, operators, and developers of energy storage in proactively designing, building, operating, and maintaining these systems to minimize fire ...

These fire incidents raise alarms about the safety of battery energy storage systems, especially when co-located or interspersed with solar panels or wind turbines. If the fire spreads, it ...

The report is a culmination of a two-year research project examining the characteristics of fires resulting from the overheating of lithium-ion battery energy storage systems (ESS) within ...

From stabilizing renewable grids to cutting industrial energy costs, Bangkok Energy Storage Battery Factory delivers adaptable solutions for Southeast Asia's energy challenges.

This fire suppression system is crucial for ensuring the safety of energy storage stations, offering advanced detection and suppression capabilities tailored to the unique risks posed by battery ...

Discover advanced fire detection and suppression technologies for BESS, including immersion technology, to enhance safety and prevent thermal runaway risks.

Huijue Group's Home Energy Storage Solution integrates advanced lithium battery technology with solar systems. Ranging from 5kWh to 20kWh, it caters to households of varying sizes.
