

Berlin introduced the solar mandate to unlock the city's rooftop solar potential and contribute to climate goals. Since 1 January 2023, new buildings and major roof renovations on ...

Berlin's mandate for solar installations on new and renovated roofs has spurred rapid rooftop expansion, but the German capital remains far from its 2035 clean energy goal.

The expansion is also picking up speed in Berlin: In 2024, approximately 12,600 new PV systems were installed - more than ever before - with a newly connected capacity of 68 MWp and a total installed ...

Berlin continues to increase the expansion of solar energy. Last year, 15,318 new installations were added, according to the Senate Department for Economics and Energy, citing ...

In the past two years alone, more than 26,500 new solar power systems with an output of over 188 MWp have been installed. However, further incentives and, among other things, more ...

Berlin, Germany - On June 25, 2024, Berlin unveiled its latest solar power plant, marking a significant step in Europe's renewable energy efforts. The new facility, located on the outskirts of ...

The subsidy scheme called SolarPLUS could finance the costs of building up the private solar capacity of the city in all stages, from the planning and feasibility study to the finished system.

From the 1st of January 2023, the Berlin Solar Ordinance mandates the installation of rooftop solar panels on all non-public construction projects in Berlin. In addition to new builds, existing buildings ...

Berlin is embarking on the next phase of its solar expansion with the new master plan Solarcity 2025-2030. The goal is to produce at least 25 per cent of the electricity generated in Berlin ...
