

Smart battery storage helps you store excess solar energy, cut energy waste, and increase the value of your solar installation while supporting a cleaner UK grid.

Maximizing UK Energy Incentives with FlashFish Systems British homeowners can leverage both the SR5000 and T2000 to capitalize on current energy policies: Smart Export ...

We are wasting no time in unlocking Britain's vast renewable potential by expanding wind and solar power. But we also need to increase our ability to store this energy for when the sun...

Britain will only make effective use of its energy potential if grid-scale energy storage keeps pace with the expansion of new windfarms and other forms of intermittent renewable energy, ...

British Solar Renewables reached financial close on 12-project solar portfolio with three co-located battery energy storage system (BESS) assets. The GBP 345 million financial package...

The energy capacity of new battery, wind, and solar projects that received approval climbed to 45GW this year, 96% higher than in 2024, according to data from Cornwall Insight.

British Solar Renewables (BSR) has announced that it has acquired the Little Crow solar and storage project from INRG. The project, which is located in Lincolnshire, will feature a 150MWp ...

British Solar Renewables has reached financial close on a 12-project solar portfolio featuring three co-located battery energy storage systems (BESS).

We're proud to announce a major milestone for British Solar Renewables (BSR) - we've secured financial close on a £345 million debt facility to fund a 609MW portfolio of solar and battery ...

The project, which combines solar power generation with battery storage, aligns with the UK's goals to increase renewable energy sources and improve energy storage capabilities.
