Planned Relocation Guidelines - A framework to undertake climate change related relocation. Date updated: July 2024.

This was the topic of discussion at the regional consultation on "Comprehensive Disaster and Climate Risk Management in the Pacific", organized as part of the "Pacific Resilience Week: ...

Express profound concern that the scientific evidence unequivocally proves that the climate system is warming and that human influence on the climate system is clear, but appropriate responses are ...

Leaders of 15 low-lying Pacific island nations declared climate change their "single greatest existential threat" at a mid-July summit in Fiji's capital, Suva.

Situated on the coast, Suva is highly vulnerable to the impacts of climate change, including rising sea levels, coastal erosion, and the increasing intensity of extreme weather events.

Climate change is not globally uniform and affects some regions more than others. On the following diagrams, you can see how climate change has already affected the region of Suva during the past ...
