

What is a solar energy museum?

The objective of the museum is to provide a permanent online location for materials critical to documenting the development and use of solar energy and highlight current and forward-looking topics. The target audience is the general public interested in learning about solar energy.

Who is the target audience for the ISES online museum of solar energy?

The target audience is the general public interested in learning about solar energy. Materials submitted to the ISES Online Museum of Solar Energy must appeal to this broad audience, aiming at raising awareness of the many aspects of solar energy, what has been achieved historically and what could be achieved in the future.

What is the Science Museum group's new gallery?

The new gallery is part of the Group's climate focused public programme, which includes our free Climate Talks series that has been watched by tens of thousands of people and featured more than 70 global leaders, experts, activists and campaigners. More information about sustainability and the Science Museum Group is available on our website.

What's happening at the Science Museum?

At the Science Museum, work is underway on Energy Revolution: The Adani Green Energy Gallery, a major new gallery opening in 2023 that explores the latest climate science and the steps needed to cut global dependence on fossil fuels.

Find out more about the Science Museum Group's approach to sustainability. Experience the full scale of a full parabolic trough solar mirror. Study part of the Zero Energy Thermonuclear Assembly ...

Experiences Explore our immersive collection of energy-focused exhibits designed for diverse learning approaches, from place-based field experiences to virtual simulations.

Because solar technology is portable and can supply power off-grid, it can democratise energy generation and supply. If the up-front costs fall, this has the potential to be revolutionary: an ...

SSTM Unveils Return Highlights: Giant-Screen Film Horse power Premieres Worldwide, and Palace Museum Co-Branded Blockbuster Exhibition "Galloping Wonders" Opens for Pre-Sales SSTM ...

Fengxian Museum is located at No. 121 Jiefang Road, on the third floor of the Science and Technology Commission Building. The exhibition hall covers an area of about 400 square meters. The exhibition ...

We want everyone to be inspired by the amazing history and potential of solar energy. Enjoy this solar photovoltaic-focused collection of solar cells, educational resources, history, and ...
