

Why do you need a corrugated iron mounting bracket?

With the corrugated iron mounting bracket you can use the existing screws in the roof. This means you don't have to drill extra in the roof. That way you run less risk. Because you don't have to drill, you have less chance of leaks. Choosing Esdec means receiving support throughout your entire solar project.

How does a corrugation bracket work?

The bracket leans on the valleys of the corrugation of the plate and closes precisely around the high part of the corrugation. This distributes pressure evenly, ensuring reduced point loading and a stable system. This screw is delivered fully assembled. The flexible adapter quickly and easily accommodates roof unevenness of up to 10 degrees.

What is clickfit Evo corrugated sheet roof?

ClickFit EVO Corrugated Sheet Roof is a flexible system for trapezoidal and corrugated sheet roofs. Mount faster! Drill less and install more solar panels.

How to mount a corrugated sheet roof?

The mounting bracket is easy to mount and advised for corrugated sheets of the 177/51 type that meet the valid standards as stipulated in EN 49.
