

# Current status of solar thermal power generation industry

Solar energy in the United States is booming. Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse and ...

In 2020, Germany recorded 44 solar district heating plants with a collector surface of 107,000 sq. m. and a total installed capacity of 75 MW. The most rising trend in the solar thermal market is the solar ...

The Solar Thermal Market size was valued at USD 22.68 Billion in 2023 and is expected to grow by 5.29% from 2024 to 2030, reaching nearly USD 32.54 Billion. Solar thermal systems utilize the sun's rays to create heat ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

The global solar thermal market size was valued at \$21.5 billion in 2021, and solar thermal industry is projected to reach \$35.3 billion by 2031, growing at a CAGR of 5.1% from 2022 to 2031.

Discover all statistics and data on Global solar thermal energy now on statista !

Solar accounted for 81% of all new renewable energy capacity added worldwide. While remaining a modest contributor to overall electricity generation for now, solar's share rose to 7% in 2024 - nearly ...

o At the end of 2024, solar was the second-largest source of U.S. generation capacity, though still a growing percentage of the U.S. electric generation mix. o In 2024, solar represented 13.7% of net ...

The solar thermal market size crossed USD 16.1 billion in 2024 and is estimated to grow at a CAGR of 9% from 2025 to 2034, driven by rising environmental awareness and government efforts to reduce carbon emissions.

The present review study, through a detailed and systematic literature survey, summarizes the world solar energy status along with the published solar energy potential assessment articles for 235 ...
