

Double glass module hidden frame installation

step-by-step, foolproof installation checklist suitable for every situation. There are many variations of installations not covered in these instructions that Special

The module frame will deform to a slight extent at low temperatures, and the maximum deformation at the frame center is generally within 15mm, which does not affect the normal installation and ...

Products have high efficiency, lifespan easy installation, high wind resistance etc. Products are made according to international standard IEC61215-2016; IEC61730-2016 and have passed authority test ...

Before installation, make sure that the connector is well protected and there should be no foreign matter such as soil, sand and gravel in the connector. If any, it must be cleaned before ...

This guide contains information regarding the installation and safe handling of Solar- space photovoltaic module (hereafter is referred to as "module"). During Modules installation and routine maintenance, ...

Before attempting to install, wire, operate and/or service the module and other electrical equipment, all instructions should be read and understood. PV module connectors pass direct current (DC) when ...

As can be seen from the figure above, the frame is only installed on both sides of the double-glass module, which is suitable for various roof photovoltaic systems, including ground ...

This guide contains information regarding the installation and safe handling of Wuxi Suntech Power Co., Ltd photovoltaic module (hereafter is referred to as "Suntech module").

There are 4~6 pairs of 9*14mm mounting holes on the frames of each Module, which can be used to ideally fix the Module to the supporting structure to optimize its load bearing capacity.

The maximum distance between two adjacent module frames should be within 50 mm (1.96 in) for the side with mounting clamps, and within 25 mm (0.98in) for the side without mounting clamps, in order ...
