

Energy storage battery shipments by 2025

According to InfoLink's latest Global Energy Storage Supply Chain Database, global energy storage cell shipments reached 612.39 GWh in full-year 2025, up 94.59% YoY. Full-year shipments ...

J.P. Morgan's recent analysis shows that shipments of stationary energy storage batteries will rise by 50% in 2025 and 43% in 2026. This surge is causing the lithium supply to move ...

New policy introduced in February 2025 requires wind and solar payment mechanisms to move toward more market-based structures, where 100% of wind and solar generation is to be ...

Our annual Battery Storage Market Map highlights a selection of companies active across the energy storage value chain - from battery manufacturers and system integrators to lithium ...

The current U.S. administration's America-first energy policies will reshape global storage markets in 2025. Expect potential tariffs of 60%+ on Chinese products and 10-20%+ on other ...

U.S. battery storage capacity has been growing since 2021 and could increase by 89% by the end of 2024 if developers bring all of the energy storage systems they have planned on line by ...

In Q1 2025, China's market showed steady growth, the U.S. market saw front-loaded shipments, and emerging markets gained momentum, driving global energy storage system shipments to a record ...

US tariffs, policy shifts and LFP dominance will drive growth to 220 GW/972 GWh by 2035. The global energy storage sector is on track for another record year in 2025 as utility-scale ...

Global energy storage battery shipments are projected to reach 392 GWh in 2025, up from 314.7 GWh in 2024 [2] [9]. That's like replacing every AA battery in your junk drawer with ...

Despite an increase in battery metal costs, global average prices for battery storage systems continued to tumble in 2025.
