

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Where can solar power be found in Georgia?

Most of the potential sites identified for renewables are located in the central, southern, southwestern and southeastern parts of Georgia and are alongside transmission and road networks. The eastern part of the country was found to be particularly favorable for solar.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Does Georgia have a potential for solar?

The International Renewable Energy Agency (IRENA) says Georgia holds vast potential for solar, with most prime sites for deployment concentrated in the country's east, based on a recent zoning assessment.

Georgia Power got the greenlight from the Georgia Public Service Commission last week for five new utility-scale solar farms, according to a news release from the power company.

Five solar power plants are set to be connected to the national energy grid for the first time in Georgia's history, marking a historic step for the country's renewable energy development. ...

Georgia Power has certified five new solar power purchase agreements (PPAs) within its borders, for a combined capacity of just over 1GW.

Explore 19 solar projects in Georgia expected online 2025-2027. Interactive map shows proposed projects by capacity. Updated February 2026.

This portfolio is expected to produce more than 90,000 MWh of solar energy annually, significantly growing Georgia Power's distributed generation footprint. Additionally, these solar projects are ...

Thinking about installing solar panels in Georgia? Find everything you need to know about incentives, cost, top companies, and more.

Learn about Georgia's 2025 solar panel costs, with rates around \$3.52 per watt and a 5 kW system costing about \$12,635.00 after tax credits.

The Georgia Public Service Commission last week approved five new power purchase agreements (PPAs) for Georgia Power, adding more than 1,000 megawatts (MW) of utility-scale ...

Atlanta-based Georgia Power has filed a request with the Georgia Public Service Commission seeking certification for two new solar-plus-storage projects totaling 350MW. According ...

A significant portion of Georgia's land area is well suited to solar deployment, with a maximum development potential of up to 87 GW, according to a new report from IRENA. The ...
