

On a snowy mountain at an altitude of 4600 meters in western Sichuan, rows of blue PV panels are generating electricity from solar energy, while the Yalong River is roaring in the distance. ...

With large proportion of Astronergy PV modules, the power plant could help to reduce the use of 600,000 tons of standard coal annually and reduce carbon dioxide emissions by more than 1.6 ...

China has launched the world's largest offshore solar farm, a 1-gigawatt project that sets a new standard for renewable energy.

Zhejiang Guanglong Energy Technology is a provider of renewable energy for power generation technology. It manufactures crystalline silicon solar cells and photovoltaic power stations.

Company profile for solar Cell manufacturer Zhejiang Guanglong Energy Technology Co., Ltd. - showing the company's contact details and products manufactured.

Far off the coast of Shandong, a new kind of power plant is quietly feeding China's coastal cities. A vast field of solar panels, fixed to steel trusses in shallow water, has become the world ...

With a planned total installed capacity of 3 million kilowatts, the plant, along with the hydro-wind-solar power stations in the Yalong River Basin, will emerge into the world's largest green, ...

A gigantic new solar farm, the first to reach 5 gigawatts (GW), has been connected to the grid in Xinjiang, China. The desert megaproject covers a land area of 200,000 acres.

After the Kela plant goes into full operation, Yalong Hydro, as the largest power generation firm in Sichuan, will have an installed capacity of more than 20 million kW, accounting for ...
