

The proposed HRES comprises a hybrid photovoltaic-wind turbine-bio generator coupled to battery storage, which caters to the energy needs of a typical household in Alta Verapaz, a ...

With rising electricity costs and growing environmental awareness, homeowners and businesses are turning to solar energy as a cost-effective and sustainable alternative.

The original owners of the Green Solar project approached BMR seeking financial investment. As part of its evaluation process, BMR determined that the solar farm offered a strong return that was ...

We are pleased to announce the successful installation and commissioning of a 5MW solar energy system in Guatemala. This project marks a significant step forward in the country's ...

His system includes three 550W solar panels and a 48V 100Ah lithium battery, making it a robust solution for providing reliable power in remote areas. This setup supports sustainable energy ...

A homeowner in Guatemala aimed to lower energy costs and enhance reliability with a solar energy system. The installation included an 8 kW hybrid inverter and a 60 kWh battery storage system.

With 15 years' experience in Central America, EK SOLAR delivers turnkey solar+storage solutions for residential, commercial, and industrial applications. Our Guatemala City-based team has deployed ...

This study analyzes the cost-effectiveness and technical performance of a hybrid renewable energy system (HRES) that can meet the power needs of low electricity-consuming households in a rural ...

From the start of commercial operations, the project has demonstrated that distributed renewable generation is both technically and economically viable, while benefiting from the latest ...

On September 8, 2024, the GSL ENERGY 60kwh wall-mounted battery home energy storage system was successfully deployed in Guatemala, bringing new changes to the local ...
