

With its recent oil discoveries and ambitious climate goals, Guyana has become a hotbed for energy storage container innovations. The country's growing demand for stable power grids, especially in ...

BESS play a crucial role in addressing this need by storing excess energy generated during periods of low demand and releasing it during peak demand periods. This capability not only enhances the ...

Designed to respond instantaneously, BESS provides "critical" backup power to protect the integrity of the electrical grid and maintain operational stability in the event of turbine failure.

LNDCH4 Guyana on Friday announced the arrival of the Backup Battery Storage System (BESS), a critical part of the power plant's emergency support system, that is engineered to ensure ...

Guyana's landmark Gas-to-Energy project reached a critical milestone with the arrival of a 30-MW backup battery energy storage system (BESS) at Georgetown's John Fernandes Wharf, ...

The arrival of the BESS marks significant progress of the Gas-to-Energy (GtE) progress and highlights LNDCH4's commitment to Guyana. Country manager Humberto Lopez stated, "This ...

The project is a central component of Guyana's push to lower energy costs and emissions by replacing heavy fuel oil (HFO) with natural gas for electricity generation.

-engineered to ensure uninterrupted energy delivery in the event of turbine failure, LNDCH4 Guyana says LNDCH4 Guyana has announced the arrival of the Backup Battery Storage ...

The BESS forms a critical part of the power plant's emergency support system and is engineered to ensure uninterrupted energy delivery in the event of turbine failure. The inclusion of ...

After a period of dedicated efforts, on January 27, 2025, the Wakenaam Diesel and BESS Storage Project was officially completed.
