

Government of Guyana commissioned its second mega-scale solar farm, the 1.5 MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At twenty-two ...

Guyana's photovoltaic energy storage grid represents more than just technology--it's a pathway to energy independence and climate resilience. By combining solar ...

The three new utility-scale projects in region ten of Guyana, with a combined capacity of 15 MW, form part of wider plans to deploy 33 MW of large-scale solar with accompanying energy...

As Guyana positions itself as a Caribbean energy leader, this EPC project demonstrates how electrochemical storage can transform national grids while supporting sustainable development goals.

A United States-based company, Curlew Mid-stream, has sealed a refined fuels venture with Guyana, aiming to enhance the country's energy security and affordability while ...

Guyana plans to install 33 MWp (megawatt peak) of grid-scale solar PV with battery storage in three of its un-interconnected (isolated) grids.

Summary: Guyana is embracing solar energy and advanced storage solutions to build a resilient power grid. This article explores how photovoltaic (PV) technology paired with energy storage systems ...

With increasing climate challenges and growing energy demands, Guyana is turning to emergency energy storage systems to ensure grid stability and disaster preparedness.

June 23, 2022: Guyana is to develop eight utility-scale solar and battery storage projects in the South American country with investment financing worth around \$83 million, the Inter ...

Guyana announces three new utility-scale solar projects totaling 15 MW with battery storage in Region Ten, part of a national program to boost renewable energy and grid stability by 2027.
