

How much does a data center user s external rack with IP65 cost

How much does a data center rack cost?

Data Center Space - The floor space of a single rack can be as pricey as \$50 - \$200 per sq ft per year on rent or leasing costs. Power Consumption - The electricity consumption by the equipment placed in a full rack incurs an extra \$1000-\$10000 per annum in terms of power bills.

How important is a rack in a data center?

When it comes to the design of the data center the rack is an incredibly important component since it is the structure that houses and supports many of the servers, storage, and network equipment. The cost per single rack in the data center depends on a number of factors as follows:
