

How to get a good quote for photovoltaic panel power generation

What should a rooftop solar quote include?

The main components of a rooftop solar installation are the solar panels, inverters, and batteries. A solar quote should, at minimum, include the brand name and model number for each component and information about the warranty coverage offered for these components. Here's some more information on what to look for:

How do I compare solar quotes?

Comparing solar quotes isn't as simple as finding the company that offers the lowest price or the best equipment. If you've gotten solar quotes, it's totally natural to be overwhelmed by what you're looking at. Here are the important things to look at when you consider each quote:

How do I choose the best solar battery?

The make and model of a battery should be included in the quote, so look for customer reviews of the brand to find the best solar battery for you. Of course, you'll also want one that suits your storage needs. Once information about the equipment is out of the way, a quote should include how the system is expected to work over time.

How do I pay for solar panels?

Here are the basics: You can pay for solar panels with cash or a loan or let the installation company lease the panels to you instead. Many financing companies now offer solar loans that are designed to help people go solar with no money down and pay off the cost using the savings generated by the solar installation.
