

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has ...

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

Rogue communication devices have been found in some Chinese solar power inverters and batteries, two people familiar with the matter told Reuters, raising concerns of potential security risks in...

US energy officials have found unexplained communication equipment inside some Chinese-made inverter devices, according to a report from the Reuters news agency. This morning, ...

The rogue devices, including cellular radios, were discovered in Chinese-made power inverters that are used to connect solar panels and wind turbines to electricity grids across the world, including the UK.

Officials are reportedly reassessing the risk posed by Chinese-made devices found in solar panels that are capable of damaging the energy infrastructure, destabilizing the power grid and ...

Officials from the United States have raised the alarm over what they have found in some Chinese solar panels linked to the electric grid. China is the world's leading manufacturer of solar...

Unexplained communication devices have been found inside some Chinese-made inverter devices, according to a Reuters report. The news agency claims US energy officials are ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication...
