

Kosovo intends to build the first battery energy storage system (BESS) in the region, which will have 170 MW of capacity and come online in 2028, a senior government policy advisor told Montel on Thursday.

Our Residential Solar Storage Systems are designed to provide homeowners with a reliable and efficient way to store excess solar energy, reducing electricity bills and increasing energy independence.

At the Kosova Energy Forum & Green Business Expo 2025, the Atlas Institute presented an overview of solar energy policies in Kosovo, addressing current challenges and future goals.

The government just dealt a royal flush with its new energy storage subsidy policy document, aiming to transform the country from an energy uncertainty to a Balkan sustainability ...

The fact that Kosovo is at an early stage of its energy transition means that it is still possible to ensure that the main policies and interventions can be just and equitable to all groups.

Held on July 21st and 22nd, participants discussed investments into the "prosumer" (an entity that both produces and consumes electricity), self-consumption markets for small-scale solar power, and the ...

The EUR 75 million is the first tranche of money Kosovo will receive from the EU's Energy Support Package for the Western Balkans worth EUR 1 billion created by the EU and its Member States to ...

To create a secure energy sector focused on citizens, with the solar auction aligning with these goals. A foundation for a new, competitive, and sustainable energy sector in Kosovo.

Kosovo has been making commendable strides in expanding its renewable energy capacity, with a strong focus on wind and solar power. The addition of battery storage is a critical ...
