

CREACTION International is a an engineering, innovation and technology transfer company operating in the Greater Region of Luxembourg, Wallonia (Belgium), Lorraine (France) and the Saar (Germany).

Headquartered in Luxembourg and operating globally, Inverto is a leading developer and manufacturer of advanced hardware and software solutions that serve the evolving needs of broadcast operators, ...

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative ...

Oct 1, 2021 &#183; Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy consumption and high electricity costs of 5G base stations.

The solar power for base station solution provides an economical and efficient energy solution for communication base stations, reducing operating costs, emissions, and improving energy

Grid-connected PV inverters have traditionally been thought as active power sources with an emphasis on maximizing power extraction from the PV modules.

Established in Luxembourg, we work closely with the European Space Agency and the Luxembourg Space Agency, we design and manufact innovative user terminals using state-of-the-art RF antenna ...

With 20 years of experience, HITEC Luxembourg has a confirmed expertise in design, system integration, commissioning, testing and maintenance of space and satellite systems, supported by a ...

Leaders in technical engineering, audiovisual projects, and precise translations in English, French, Spanish, and German. We provide innovative solutions tailored to each client"s needs, covering ...

Inverters have assumed that the grid is strong and will provide a stable and clean voltage and that they are able to inject real power into the grid without undue impact on its operation.
