

Majuro energy storage project under construction

The project, implemented by MEC, has a budget of \$34 million and a lifespan from 2017 to 2022, with an extension until October 2024.

The new Belize Energy Resilience and Sustainability Project will deploy state-of-the-art battery energy storage systems across four strategic locations in the country, marking a significant step forward in ...

The Majuro Energy Storage Project represents a critical step toward sustainable energy solutions in Pacific island nations. With 92% of Marshall Islands' electricity currently generated from imported ...

The project installs an advanced metering infrastructure (AMI) in the Majuro power distribution network to enable Marshalls Energy Company (MEC) to collect data on physical energy flows, reduce ...

The proposed project will support energy distribution systems in Majuro city, low carbon renewable energy installations in the RMI and sector reforms, institutional strengthening as well as resilience on ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). [pdf]

Distributed energy resources--such as distributed photovoltaics (DPV), battery energy storage systems (BESS), and electric vehicles (EV)--will be critical as the Government of India looks to modernize its ...

New power plant and new generators: Construction work on the Marshalls Energy Co.'s new "Power Station 1" building started late last year with a late 2026 completion date targeted.

Recent data shows Pacific energy storage projects achieving 94.7% system availability when combining lithium-ion batteries with advanced EMS platforms.
