

How can Monash support microgrid implementation in Victoria?

Monash University has developed a suite of interactive resources that will support the implementation of microgrids in commercial, industrial and community settings in Victoria, partly funded by the Victorian government's Microgrid Demonstration Initiative.

Why is Victoria investing in microgrid demonstration projects?

Minister for Energy, Environment and Climate Change Lily D'Ambrosio said: "The Victorian Government is investing in microgrid demonstration projects to improve the agility, resilience, and reliability of Victoria's electricity system.

What is a Victorian microgrid?

The Victorian Government is supporting and developing microgrids. A microgrid can be thought of as a small 'subset' of the electricity grid that provides energy generation and storage to properties at a local level. They can incorporate renewable energy generation from solar panels or wind turbines as well as battery energy storage.

How can microgrid solutions address regional Victoria's energy needs?

using microgrid solutions<sup>1</sup> to address the energy needs for regional Victoria. Current microgrid solutions include a variety of configurations, and individual geographic locations within Victoria have unique technical and operational requirements.

An investigation of four different microgrid-related experiments in Victoria, Australia revealed a number of commonalities and differences in relation to the drivers and challenges that ...
