

The Republic of Nauru is an island of just 21 square kilometres, with more than 9,500 citizens, that is highly dependent on imported fossil fuels for transport and power generation.

Since China and Nauru restored diplomatic ties earlier this year, bilateral win-win cooperation has rapidly expanded, yielding beneficial outcomes for local communities. Nauru, with its beautiful ...

The project includes a 6-megawatt solar farm which, now nearing completion, is expected to lift renewable energy's share of electricity generation from 3 per cent to 47 per cent.

Nauru faces significant financial barriers in its transition to renewable energy. The high initial costs of renewable energy projects, such as solar power plants and battery storage systems, are a ...

Nauru's tropical climate demands efficient cooling systems, but traditional AC units strain its limited energy resources. Solar air conditioning offers a game-changing alternative - reducing energy bills ...

We specifically focus on household appliances including: refrigerators, clothes washing machines, electric stoves and air conditioning units.

This article examines Nauru's shift to sustainable solar energy, addressing its historical reliance on fossil fuels and the associated economic and environmental challenges.

The \$22-million solar plant's full operation is expected to reach the full capacity--depending on the weather--by January 2026, according to a press release from the ...

We provide repair, maintenance, design and installation of commercial air-conditioning. Each project is tailored to the system we design which is suited to the needs of you, your team and your customers. ...
