

Renewables 2021 - Analysis and key findings. A report by the International Energy Agency.

This publication presents statistics for the decade 2010-2019 in trilingual tables, covering off-grid power capacity, biogas production and numbers of people using off-grid power and biogas for ...

The report provides statistics covering 2012 to 2021, looking at mini-grids, biogas for cooking and lighting, off-grid solar lights, pumps and home solar systems across Africa, Asia, Central ...

This report was prepared by Dennis Akande, Nicolas Coent and Xiaomin Han from the IRENA Statistics Team. For further information or to provide feedback, please contact the IRENA Statistics Team ...

Clean Energy Council (CEC) European Renewable Energies Federation (EREF) Global Off-Grid Lighting Association (GOGLA) Global Solar Council (GSC) Global Wind Energy Council (GWEC)

The renewable power capacity data shown in these tables represents the maximum net generating capacity of power plants and other installations that use renewable energy sources to produce ...

LCOEs for 100% renewable energy systems decreased by 9% annually from 2016 to 2021. Most case studies were conducted for India (22%), Iran (7%) and China (7%). Recent global ...

Investments in off-grid renewable energy worldwide from 2010 to 2021 (in million U.S. dollars) You need a Statista Account for unlimited access Immediate access to 1m+ statistics Incl....

Since 2010, 360 million people have benefited from improved access to energy through off-grid solar lighting products and 86 million metric tons of CO<sub>2</sub>e have been avoided - the equivalent of taking 22 ...
