

Oil platform using Kampala folding container 20kW

The Uganda National Oil Company (UNOC) says with the two finished petroleum storage terminals in the country, Ugandans will hugely use the facilities and rely on them for fuel and other ...

Situated strategically in the Wakiso district, the facility ensures consistent supply to the expansive Kampala market and other major consumption centres. The Uganda National Oil ...

The Kampala Storage Terminal (KST) will be Uganda's largest inland petroleum storage facility. Designed to international engineering and safety standards, KST will strengthen national fuel ...

The purpose of this study is to investigate the potential use of solar energy within an oil refinery to reduce its fossil fuel consumption and greenhouse gas emissions.

The Solarcontainer is a mobile system that can be used for both on- and off-grid purposes, including rescue missions and gatherings. the foldable photovoltaic panels are tucked inside a mobile solar ...

The \$5 billion EACOP project is central to Uganda's oil strategy. It features a marine terminal in Tanga, Tanzania, equipped with four heated tanks of 500,000 barrels each to keep crude at over 63°C, ...

It is expected that Kampala Storage Terminal will reduce Uganda's petroleum products (fuel) shortages that usually lead to speculations and sometimes abnormal increase in fuel prices.

The terminal is planned to serve as a storage facility for both Government strategic reserves and providing "hospitality" (storing fuel for oil marketing companies). It is also planned as a hub for ...

Here, we provide comprehensive information about large-scale photovoltaic solutions including utility-scale power plants, custom folding solar containers, high-capacity inverters, and advanced energy ...

A new terminal planned in Kampala will add 320 million liters, equivalent to 2 million barrels. These facilities will complement Tilenga and Kingfisher's central processing facilities, which ...
