

Energy storage is a critical component of Arizona's clean energy future. Energy storage systems capture solar energy when the sun is shining bright for use after sunset to meet customers' needs.

The Eleven Mile Solar Center is situated just south of the state capital, Phoenix, and includes a co-located 4-hour duration 300MW/1,200MWh battery energy storage system (BESS).

The Justice Energy Storage project is designed to alleviate pressure on the grid by storing renewable energy--especially solar power--during the day and releasing it during the evening when demand ...

Strata has extensive experience with more than 300 projects, over 6 GW of PV solar and 26 GWh of storage in development, and 3.0 GW under management across the United States.

Strata celebrated the official commissioning of the Eleven Mile Solar Center in Pinal County near Phoenix, Arizona. The 300 MW solar farm and 300MW/1200MWh battery energy ...

The Justice Energy Storage Project represents Strata Clean Energy's commitment to fostering a resilient and decarbonized energy future. Located near Phoenix, this innovative battery ...

US solar and storage development company Strata Clean Energy LLC on Thursday said it has kicked off the construction of its 150-MW/600-MWh Justice Energy Storage project in Arizona, ...

With over 170 projects in operation, more than 8 GW of solar and 31 GWh of storage in development, and 4.2 GW under management nationwide, Strata leads the clean energy sector.

A 1,200 MWh storage facility developed by Canadian Solar subsidiary Recurrent Energy has reached commercial operations. The largest grid-scale battery in Arizona is now activated and ...

Strata breaks ground on 150 MW energy storage project in Arizona to enhance grid resilience and clean power delivery.
