

Right now, U.S. manufacturers do not produce enough solar panels to meet the nation's demand, but industry investments and federal tax incentives have been making progress, though ...

Between 2020 and 2023, the residential solar market experienced unsustainable growth, with 30% per year rates. This surge came from factors like gas supply disruptions in Europe, policy ...

The latest draft of the bill is broadly negative for clean energy, but it is particularly damaging to residential solar, cutting federal tax credits far sooner than expected.

Analysts now think solar investment will rebound in America. Wood Mackenzie, a consultancy, spots signs of a coming Trump bump (see chart).

For decades, one of the near-constants in the shift to renewable energy was that solar panel prices were decreasing. This downward curve hit a bump in 2020. Global prices began to rise,...

US solar boomed in Q1 2025, but new tariffs and House-passed tax credit cuts threaten jobs, factories, and energy security.

The solar industry grew 128% during Trump's first term, from 2016 to 2020, according to trade body the Solar Energy Industries Association (SEIA). It was the largest source of electricity ...

Slight uptick in material costs: The cost of solar panels has fallen dramatically over the past decade, but prices have started to tick back up lately, according to Michaud. "Everything has...

PHILADELPHIA -- The solar power industry is booming and that growth helps the world meet its climate goals by replacing fossil fuels. But an emerging problem in the U.S. solar business ...

Solar stocks plunged Thursday after House Republicans passed a tax bill that terminates key clean energy credits.
