

Photovoltaic power generation and wind power concept stocks

Should you invest in wind energy stocks?

Several states, including Texas and Massachusetts, will likely see significant wind power capacity additions in the coming years. As the wind energy sector gains traction with greater flexibility and scalability, it has emerged as an attractive theme for investors seeking to invest in high-potential stocks.

Are solar and wind projects eligible for tax credits?

Under the new tax and spending bill signed into law, solar and wind developments are eligible for tax credits if they begin construction within 12 months of the bill's enactment. With the new provision, small project developers can claim tax credits on spending at least 5% of the project cost.

Will Trump phase out tax credits for new wind and solar projects?

President Donald Trump has rattled the sector by reiterating plans to phase out tax credits for new wind and solar projects unless they begin construction in July 2026. Initially, developers could claim tax credits on spending at least 5% of the project cost without any other restriction.

How much will wind power output increase in 2025?

Per the latest Short-Term Energy Outlook published by the U.S. Energy Information Administration (EIA), the wind power output is projected to increase approximately 4% year over year in 2025.
