

# Postgraduate Entrance Examination for Solar Power Generation

What can you do with a photovoltaics & solar energy degree?

Increased focus on sustainability and the climate crisis has opened an array of new job opportunities to explore the best use of renewable energy technologies. As a Photovoltaics and Solar Energy graduate, you'll be able to work across a range of industries to develop a more sustainable future.

What can I do with a solar degree in Exeter?

Exeter's degrees cover a full range of topics from solar, marine and wind generation to policy and governance within the energy sector. Based at our Penryn Campus in Cornwall, you'll get first-hand experience from access to the region's many specialist renewable energy laboratories, wind farms, solar photovoltaic systems and offshore test sites.

Where can I learn about PERC solar energy?

Learn from innovators and leading academics at UNSW's School of Photovoltaic and Renewable Energy Engineering, the birthplace of the PERC solar cell. In the Master of Engineering Science (Photovoltaics and Solar Energy), you'll focus on the booming sustainable energy industry.

Where is the 2025 Postgraduate Entrance Exam?

Test-takers enter an examination site for the 2025 postgraduate entrance exam in Harbin, northeast China's Heilongjiang Province, Dec. 21, 2024.
