

# Regulations for solar-powered communication cabinet inverters

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

The upcoming changes to US regulations for grid-tied inverters aim to modernize the power grid and enhance its reliability. These updates touch on several critical areas, from safety ...

Technological advances, new business opportunities, and legislative and regulatory mandates are all contributing factors that drive the need for up-to-date interconnection and interoperability standards ...

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented communication devices embedded in power ...

Smart inverters provide two critical functions to a small-scale solar energy system; they convert the direct current (DC) produced by solar panels to the alternating current (AC) used on the electric grid, in homes, and ...

On May 21, 2020, the IEEE 1547.1-2020 standard was officially published, making smart inverters with standard communication interfaces the official U.S. national standard for Distributed Energy Resources (DER).

In May of 2025, U.S. experts found undocumented communication modules and secret radios embedded in some Chinese-manufactured solar inverters and battery systems.

Modern grid codes are becoming more specific about the security measures required for inverters and energy storage systems. These mandates are built on established cybersecurity principles adapted for ...

While inverters are built to allow remote access for updates and maintenance, the utility companies that use them typically install firewalls to prevent direct communication back to China.

PV system inverters should be sited at least 150" away from navigational and communications equipment that may be sensitive to EMI. A minimum setback distance of 250" should be imposed between an airfields radar ...
