

San jose invests in energy storage cabinet batteries

The San Jose Cabinet Energy Storage System isn't just another battery - it's like the Swiss Army knife of power management. Imagine having a compact unit that can store excess solar energy during the ...

We are happy to announce that our first investment in new renewable energy, an innovative solar plus battery storage project in Kern County, is now producing power. This project was built by developer ...

Three virtual power plant (VPP) programmes have been announced in California and Colorado. Two of them will use Tesla's Powerwall battery. Another is attempting to change customer ...

Our mission is to revolutionize the energy storage industry and have a sustainable impact on the world. And the way we do that is with solid-state lithium metal batteries. We've built a large facility here in ...

San Jose's State recently joined the Aqueous Battery Consortium, an energy hub research project supported by the Department of Energy (DOE) and led by Stanford University and SLAC ...

Battery storage acts as a critical bridge between clean energy and reliability. By capturing excess solar and wind power when it's plentiful and releasing it when demand peaks, ...

The innovative Kern Solar and Battery Storage Project built by Terra-Gen is providing power for SJCE customers in a unique format: fixed delivery of 62 megawatts (MW) of renewable energy between ...

Battery systems now provide enough capacity to meet the equivalent of roughly one-quarter of California's record peak demand for several hours. The rapid expansion of California's ...

esVolta announced it has secured a \$110 million tax equity transaction with GreenPrint Capital Management. The tax equity is intended to support the construction of the 75 MW / 300 MWh ...
