

Should the house be equipped with solar power generation

Should you buy a solar-powered home?

Buying a solar-powered home can jumpstart your clean energy transition, joining millions of other American households that are powering their lives with sunshine. See more solar energy resources for consumers and learn how solar works.

What are the benefits of a solar-powered home?

Five innovative features of a solar-powered home include solar panels, energy-efficient appliances, smart home technology, green roofs and rainwater harvesting systems. Solar homes can reduce environmental impact, lower energy bills and promote sustainable living practices.

Are Solar Homes a good idea?

Solar homes can reduce environmental impact, lower energy bills and promote sustainable living practices. In the last 10 years, homes with rooftop solar arrays have gone from curiosity to commonplace. It's a trend perhaps best exemplified by Home Depot 's decision to start stocking solar panels in 2001 [source: DOE].

Should you buy a solar home if you're not the original owner?

Solar will save almost all homeowners money, even if you're not the original owner. You might encounter one of four solar home scenarios when you're shopping for a house: fully-owned solar panels, leased solar panels, solar panels purchased with a solar loan, and PACE (Property Assessed Clean Energy) financed solar panels.

Consequently, while total energy output may be lower in limited sunlight conditions, solar energy evaluations affirm that homes can still efficiently harness solar energy even in less-than-ideal ...
