

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Are solar panels a good investment in Georgia?

Solar power is blooming in the Peach State. Georgians use more energy every month than most Americans, which means installing solar panels in the area is more beneficial from a financial perspective than in most states. However, the high solar panel cost in Georgia can be a deterrent for many homeowners.

How much do solar panels cost?

The cost of solar panels in Georgia is currently lower than the average price of \$3.00 per watt across the United States for residential solar power systems. The size of a solar panel system affects the installation cost, with larger installations having a lower cost per watt due to 'bulk pricing'.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Residential solar panel installations are usually \$10,000 to \$30,000 in Georgia. Learn how long-term savings outweigh the upfront costs for many.
