

KEPP GENSET is the first commercial-ready magnetic-drive power generator. No fuel, zero pollution emissions, clean energy, expandable and scalable power generation solution.

Clean Power proves to be on the horizon as the world's first-ever, completely fuel-free electromagnetic power generator, has been unveiled by the SEMP Research Institute in South ...

According to the company, AISEG is a non-rotational power generation system operating on fundamental electromagnetic principles and laws such as Biot-Savart's and Faraday's laws. The ...

These systems can efficiently harness solar energy, saving vast areas of space and maximising the overall energy output. Combining PMGs with solar power creates a robust and resilient energy ...

Discover the innovative world of electromagnetic power generators, a sustainable, fuel-free energy solution harnessing the principles of electromagnetism. This article explores how these ...

In the present study, we investigated the design and performance of a small hybrid magnetic generator. With small solar electrical generators, the permanent magnetics are replaced ...

When it comes to renewable energy, Electromagnetic Generators play an important role in converting natural forces such as wind, water and ocean currents into electricity. That ability has put these ...

Whether you choose a hybrid generator or a linear generator, you can rely on these magnet-powered options to meet your energy needs while minimizing your environmental impact.

A cutting-edge smart electromagnetic generator, capable of meeting the demand for electric power without the need for traditional fuel sources, has been showcased at Cop28 in Dubai.

Our Theron Generators are self-propelled generators that do not need any fuel source or gas source or solar or wind or propane source. Our generators propel themselves and keep running for as long as ...
