

Explore a searchable database of US construction and building code. Code regulations are consolidated by state and city for easier navigation.

NAICS code 221114 refers to establishments in the United States that operate solar electric power generation facilities, which use energy from the sun to produce electric energy.

Learn how the NEC, UL standards, building codes, and permits impact solar power projects, plus tips to ensure your installation is safe and compliant.

NAICS 221114 - Solar Electric Power Generation encompasses the production, installation, and maintenance of solar photovoltaic (PV) power generation systems and related infrastructure.

Establishments primarily engaged in installing solar panels or solar heating equipment are classified in Industry Group 2382, Building Equipment Contractors. Get detailed descriptions of NAICS codes to ...

The installation of a solar photovoltaic (PV) system is an increasingly attractive way to reduce the cost and environmental impact of producing and using electrical energy. However, these ...

The NAICS code 221114 is applied to those industries related to Solar Electric Power Generation. This U.S. industry comprises establishments primarily engaged in operating solar electric power ...

The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and standards governing ...

As electrical related components and systems are a critical part of any solar energy system, those provisions of the National Electrical Code (NFPA 70) that are most directly related to solar energy ...
