

Solar power generation photovoltaic panels are closed

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility in California's Mojave Desert was once...

The main buyer of the plant's power -- California utility PG& E -- released a statement saying it's pulling out to save its customers money. Ivanpah's set to close early next year.

Despite its ambitious scale and sci-fi movie appearance, the Ivanpah solar plant, which cost \$2.2 billion to build, is scheduled to close in 2026.

Two Ivanpah units are slated to close starting in 2026, per a January 2025 announcement pending CPUC approval. Here's the original context and what repurposing could look ...

Headlines have been circulating major news outlets around the impending closure of the Ivanpah Solar Power Facility, a \$2.2 billion project that began construction in 2010 and has been...

The Ivanpah solar plant, off the Interstate 15, just across the state line from Primm, will continue to operate after the California Public Utilities Commission denied Pacific Gas & Electric...

Tucked away in California's Mojave Desert, the Ivanpah Solar Electric Generating System stands as a testament to ambitious renewable energy innovation. For over a decade, it has powered ...

California built a \$2.2 billion solar thermal project in the Mojave Desert in the early 2010s, with 75% of it funded by the Obama administration through loan guarantees. The project, the ...

The Trump administration wants to see this unusual power plant closed, and in a rare instance of alignment, the Biden administration did, too.

The Ivanpah Solar Electric Generating System in California's Mojave Desert--once hailed as a breakthrough in solar energy--is nearing its end. Built in 2014 using solar thermal tower ...
