

How do solar farms make money?

Solar farms generate revenue primarily by converting sunlight into electricity, which they sell to utilities or in markets for renewable energy. Your investment in a solar farm taps into this revenue stream through various financial mechanisms. You earn money as your solar farm produces electrical power and feeds it into the power grid.

How much IRR do solar farms deliver?

Solar farms typically deliver IRRs in the range of 5% to 8%, depending on installation costs, local energy pricing, and tax benefits (LEV, Shasta Power). At Shasta Power, we target a robust 18% IRR across the life of the investment by combining returns from multiple projects, securing PPAs, and maintaining capital efficiency.

How to invest in solar power?

You can purchase shares of a company stock, including solar panel manufacturers. You can also buy exchange-traded funds (ETFs) or index funds that invest in solar companies. And lastly, you can invest directly in private businesses involved in the production of solar power. 1. Solar Stocks
