

Solar temperature controlled circulating water pump

Below you'll find a concise product overview, followed by detailed sections for five standout pumps and a Buying Guide to help you compare features and make an informed choice.

WiseWater 110V Circulation Pump, 130W 13 GPM Hot Water Recirculating Pump, 3 Speed Switchable Circulator Pump with 3/4" FNPT Flanges for Boiler, Solar Heater and Hydronic Radiant Heating

One of the most reliable solar water heater pumps on the market, the Grundfos Solar Circulator Pump stands out for its efficiency and durability. This pump is designed specifically for ...

This guide reviews top options suited for various applications, including pumps designed to circulate solar-heated water and portable immersion heaters that complement solar systems.

An assortment of circulators with integral solar differential temperature controls are able to accommodate a wide variety of solar thermal installations. Easy to install, our solar pumps, ...

This guide highlights features, installation considerations, and performance insights to help you pick a pump that keeps hot water circulating reliably with minimal noise and energy use.

12VDC Solar Hot Water Pumps - Can handle temperatures up to 230F and Pressures up to 145PSI - With three-phase ECM brushless DC motor. FDA, REACH, CE, RoHS, ISO9001 certificated (3.0 ...

Choosing the right circulation pump is crucial for efficient solar water heating. This guide highlights five top options, covering both 12V DC and line-powered models, with a focus on low ...

For solar system loops, the D5 Circulating Pump with PWM powers directly from a photovoltaic panel. The sun comes up and heat builds which produces electricity in the PV panel. The pump slowly ...

These solar pump stations are used on the solar loop of a solar thermal system to circulate the heat transfer fluid through the array. They are also used to control the temperature in your solar storage tank.
