

EBRD powers Serbia's future with a EUR105 million loan for a groundbreaking solar thermal plant, set to revolutionize Novi Sad's energy landscape and cut gas consumption by 29%!

The recent energy crisis has made matters worse. Now there are plans in place for UGT Renewables and Hyundai Engineering to provide a series of self-balanced utility-scale solar projects bringing ...

The Serbian government has approved a loan agreement with the European Bank for Reconstruction and Development (EBRD) for the construction of a solar-thermal power plant in Novi ...

The Project will be implemented by the Company in coordination with the Ministry of Mining and Energy ("MoME") and the City. The Project is expected to be co-financed with an ...

A major modernization of Novi Sad's district heating system will include the construction of a large solar-thermal plant, a seasonal heat-storage facility and an absorption heat pump.

Thermal energy storage and heat pumps are the topic number one in the EU. The Balkan region's largest solar thermal system for the preparation of sanitary hot water using solar ...

The European Bank for Reconstruction and Development (EBRD) is investing up to EUR105 million (\$109.5 million) in a large-scale solar-thermal plant in Novi Sad, Serbia. The project is ...

The plan is to build a large solar thermal facility for energy storage on about 20 hectares of land in the vicinity of gas-fired cogeneration plant TE-TO in Novi Sad, Serbia's second-largest city.

The realization of two huge solar district heating projects in the Balkans is progressing. The pre-qualification tender for a 44 MW collector field with seasonal storage in Pristina, Kosovo, ended on 11 ...

The European Bank for Reconstruction and Development (EBRD) has signed a loan agreement to fund the construction of a solar-thermal power plant in Novi Sad, Serbia. The ...
