

Falling module prices, rising carbon-neutral pledges, and widening retail-grid parity are reinforcing investment momentum across Vietnam, Indonesia, Thailand, the Philippines, Malaysia, ...

PV module manufacturing capacity in Southeast Asia has reached 86.5 GW across 61 active sites, according to Hong Kong-based quality assurance firm Sinovoltaics. The figures come ...

Southeast Asia has solidified its position as a global hub for solar PV production. The International Energy Agency (IEA) notes that the region accounted for roughly one-third of global PV ...

Southeast Asia is experiencing one of the fastest growth rates globally in solar manufacturing capacity. The region's current nameplate photovoltaic (PV) module capacity stands at ...

Local enterprises in Southeast Asia, second only to Chinese companies, have a total module capacity of about 16GW. Representative companies include Vietnam's Bovie Solar, ...

Having benefited from anti-China trade measures, Southeast Asia had become the largest source of US solar photovoltaic (PV) imports - until Washington turned on the region. Once ...

The arrival of factories backed by Chinese solar heavyweights such as Trina, Longi, JA Solar and Jinko Solar, among nearly 20 other competitors, has transformed Malaysia, Vietnam, ...

In the 1st edition of its Southeast Asia Solar Supply Chain Map for 2025, Sinovoltaics expects the nameplate solar PV module manufacturing capacity of Southeast Asia to grow from 86 ...

Sinovoltaics reveals 86.5 GW of PV module manufacturing capacity in Southeast Asia, highlighting key trends and strategic shifts as the region reshapes global solar supply chains.

Southeast Asia is experiencing one of the fastest growth rates in solar manufacturing worldwide. The region's nameplate photovoltaic (PV) module capacity stands at 86 GW and is ...
