

Spanish solar power generation for home use

Is Spain a leader in solar energy adoption?

In Spain, the progress has been even more dramatic. Photovoltaics reached an all-time high, accounting for 21% of electricity generation, nearly double the EU average. This marks a significant jump from 17% in 2023, solidifying Spain's position as a leader in solar energy adoption. What are photovoltaics?

Is solar energy a renewable resource in Spain?

Although wind is currently the most used renewable resource in the Mediterranean country, solar energy is growing at a very fast pace. In fact, the solar capacity installed has more than quintupled in the last five years. In 2023, Spain was the sixth country worldwide in terms of new capacity additions.
