

Construction has started on what is described as the world's largest flow battery, an 800-MW/1.6-GWh project in Laufenburg, Switzerland, non-profit association Flow Batteries Europe (FBE) ...

Swiss company Flexbase is planning to build a 500MW/1.2GWh flow battery on the Swiss-German border. It is claiming it will be the biggest flow battery in the world. The company is ...

Construction work began in May 2025. Completion of the structural framework is expected by the end of 2027, with commercial operations scheduled to start in the summer of 2028.

Flexbase Group has begun construction on what could become one of Europe's largest flow battery storage installations, breaking ground on an 800 MW/1.6 GWh redox flow system in ...

To mark the start of the construction phase, leaders from Flow Batteries Europe (FBE) and the FlexBase Group met in Laufenburg, Switzerland to solidify cooperation on addressing energy security at the ...

The "world's largest and most modern redox flow battery storage system" will be built on a 20,000m² footprint with a power output of 800MW and an energy storage capacity of more than 1,600MWh, the ...

The world's largest battery storage facility is to be built in a new technology center in Laufenburg (TZL) in the Swiss canton of Aargau - directly on the German border.

Swiss developer FlexBase has commenced construction on a cutting-edge technology center in Laufenburg, a scenic town along the Rhine in the canton of Aargau.

FlexBase Group will start construction on a data centre plus 800MW/1,600MWh flow battery in Switzerland imminently, the firm claimed.
