

Tendering for photovoltaic energy storage project in colleges and universities

Fifteen universities were selected for screenings based on campus solar and sustainability goals, plans for future solar projects and solar deployment capacity (megawatts), regional diversity, energy costs, ...

UGE develops, owns, and operates community solar and energy storage projects. Our systems provide hosts and communities cheaper, cleaner, more reliable energy with no upfront cost. With over a ...

A series of screenings carried out by the National Renewable Energy Laboratory (NREL) at universities nationwide have illustrated the potential benefits of solar PV and energy storage ...

With proven guidance and strategic use of incentives and financing structures, colleges and universities can confidently transition to cleaner energy sources and advanced energy storage, ...

The system will save the school millions of dollars each year and regulate temperature for over 180 buildings. The university plans to phase out nonrenewable energy sources such as ...

While providing assistance to universities issuing RFPs, NREL has developed a list of common issues to consider when writing an RFP for solar PV. Some universities may want to maximize cost-effective ...

There has been a surge of solar energy implementation across the United States - leading the charge are major educational institutions like Oberlin College, the University of Florida, Texas A& M ...

The School Project for Utility Rate Reduction (SPURR) announces a Request for Proposals (RFP) seeking qualified vendors to submit responsive proposals for solar photovoltaic and ...

Following an open, competitive solicitation process, these funding opportunities encourage collaborative partnerships among industry, universities, national laboratories, federal, state, and local governments ...

Our project team has secured hundreds of solar projects (completed and in progress) in the education sector, including K-12 schools, universities, and community colleges nationwide.
