

Joshua Rhodes, a research scientist at The University of Texas at Austin, compares energy storage batteries to Lego bricks that can be transported by truck, assembled on location and connected to ...

Currently, e-STORAGE operates fully automated, state-of-the-art manufacturing facilities with an annual battery energy storage system capacity of 15 GWh and battery cell capacity of 3 ...

Last month's sprawling winter storm from Texas to New England was one of the first multigrid tests in the U.S. for big batteries. They passed. Texas, in particular, benefited from energy ...

Nofar USA and Qcells team up for 350MW energy storage projects in Texas, enhancing grid resilience and renewable integration.

Construction has already begun on the BESS, dubbed the Gunnar Reliability Project. It is expected to begin operations by the end of 2026 and it will provide the power equivalent to serving ...

Lithium-ion batteries stacked up in a storage system configuration. A new battery storage facility is in operation in South Texas.

Officials said the state added about 6.4 GW of energy storage capacity in 2024, and more than 12 GW of storage has been deployed on the ERCOT system to date. Officials have said ...

Qcells USA Corp., a subsidiary of South Korea's Hanwha Qcells, has partnered with Nofar USA to develop and construct two battery energy storage projects with a combined capacity of ...

With Texas being one of the nation's leaders in energy storage growth, now is the time for businesses to capitalize on this momentum and take control of their energy future.

In a remarkable shift for America's oil and gas heartland, Texas has emerged as the nation's clean energy powerhouse, with solar farms and battery storage facilities driving virtually all ...
