

# The first wind power project connected to the grid

The world's first 20-megawatt (MW) wind turbine, which is capable of powering more than 44,000 times a year, has finally been connected to the Chinese's grid.

ZHANGZHOU, June 28 (Xinhua) -- The phase II project of Zhangpu wind farm, China's first offshore wind farm with the largest single-capacity turbines, was connected to the grid for power generation ...

At 14:30 on July 19, the world's first 16-megawatt ultra-large-capacity offshore wind turbine was successfully connected to the grid and began generating electricity at the Fujian offshore wind ...

On November 17, against the backdrop of the majestic Yarlha Shampo Snow Mountain, the China Huadian Corporation's Wind Power Project in Qonggyai County - whose highest turbine ...

In 2011, the U.S. Department of Energy released the National Offshore Wind Strategy, introducing an innovative way to generate wind energy. The University of Maine then deployed a ...

China has reached a new milestone in clean energy after the world's first 20-megawatt offshore wind turbine was successfully commissioned and connected to the power grid off the coast ...

It is connected to the grid for power generation after successful debugging. This is the first time that China has completed the hoisting, commissioning and grid connection of a 20-megawatt ultra-large capacity wind ...

On February 8, 2026, the first wind power project of Huaneng in Tibet, Huaneng Caipeng Wind Power Project, officially connected its first batch of units to the grid for power generation, ...

This marks China's first offshore installation, commissioning and grid connection of an ultra-large-capacity 20-MW wind turbine, representing a major advance in the country's capabilities in ...

The first batch of units of the Tsampa Wind Power Project in Shannan, Tibet was officially connected to the grid for power generation on the 8th. It is expected to generate over 2.23 billion kilowatt-hours of ...
