

The reason why London shut down the wind and solar hybrid solar container communication station

Unexplained communications devices, not listed in product documentation, have been found in Chinese-made solar power inverters in the USA.

Last November, a Chinese solar company named Deye remotely shut down solar power systems in the United States, the United Kingdom, and Pakistan. "This inverter is not allowed use ...

This isn't purely hypothetical, either. In November 2024, some solar inverters in the U.S., U.K. and Pakistan were actually disabled remotely from China.

Solar and wind power systems have been prime solutions to the challenges centered on reliable power supply, sustainability, and energy costs for several years. However, ...

The rogue devices, including cellular radios, were discovered in Chinese-made power inverters that are used to connect solar panels and wind turbines to electricity grids across the world, including the UK.
