

This paper introduces a design of an annular water-cooled automotive exhaust-based thermoelectric generator (TEG). A comprehensive numerical model of TEG system is established to ...

Our wet exhaust specialists design the very best water separator and wet exhaust systems for your superyacht project. Not only for generator exhausts, but also for your propulsion exhaust system.

A device utilizing water to dampen the sound produced by a combustion engine, particularly those found in electrical power generating sets, reduces noise pollution by channeling ...

Important Exhaust System Installation Information generator set is equipped with a wet exhaust system. Improper installation can fill up the engine with water and cause severe engine

With a remote cooling system, less airflow is required, but there will still need to be adequate airflow to remove radiant engine/exhaust heat, alternator heat, and provide enough combustion air for the ...

Centek Marine offers both propulsion and generator exhaust. With propulsion exhaust, gases directly from the engine reaching up at 1,000 degrees Fahrenheit are carried in a metal riser and injected ...

We offer aftermarket cast manifolds for those who can not wait for our quality product. The aftermarket cast versions do not have the longevity of our welded product and therefore will only ...

Water cooled manifolds can be used to reduce the heat buildup in the generator area as in a boat bilge where you want to keep the heat buildup down. They are not required in generators ...

Soundown's Combi WaterDrop Silencer is a marine wet exhaust muffler designed for use on generators. The Combi packages good acoustic performance in a compact size for applications where low noise ...

We understand the importance of protecting your time and money. This is why we focus on crafting only the highest quality exhaust elbows, using only Titanium. Contact us today to learn more about our ...
